Organic Soybean Seed

Our Organic NON GMO Soybean are procured from our contract farmers who have organic certified farms which is further brought to organic certified cleaning and grading unit where all foreign impurities are removed and finally graded in different sizes. Further we have unique hand picking system where manually further if any impurities found are removed. We can supply Organic Soybean for both food grade as well as feed grade.

The process starts with collection of organic soybean seed from our contract farmers.

This farmer grade soybean comes to our factory which goes into our extensive soybean cleaning and grading unit. We use pre cleaner & fine cleaner (Grader), high quality de-stoner and magnetic separator, spiral separators, gravity separators and at the end it further goes through unique "Hand Picking System".

Quality check of our products and certification is done by reputed laboratories like SGS and Microchem-Silikare on certain parameters such as physical characteristics, nutritional attributes, microbial status, heavy metal and pesticide residue

We also focus on careful packaging of the soybean as well as the shipping containers to ensure that it remains genuinely organic throughout its journey.

Features	
Cultivation Type	Organic
NON GMO	100%
Grade	Export
Protein	38% Min
Fat	18% Min
Moisture	10% Max
Purity	99% Min
Foreign Matter	1% Max
Additional Information	
Min. Order Quantity	20 Metric Ton
Payment Terms	L/C
Delivery Time	10 Days
Packaging Details	HDPE Bags / 1 MT Jumbo Bags / Bulk in Container
